AL BALQA GENERAL TRADING CO L.L.C.

(Mechanical & Civil Construction Equipments, Machinery, Spare Parts, & Building Material)

COMPANY PROFILE

Tower Cranes & Heavy Lifting Equipment — Sales, Rental & Service

Your Trusted & Reliable Construction Equipment Supplier & Service Provider

Established 2013 | Dubai, UAE | Serving the UAE, GCC & MENA region

WHO WE ARE

Al Balqa General Trading Co. LLC (ABGT) was established in 2013 in Dubai, UAE. We are specialists in the management, trading, sales, rental and servicing of heavy construction lifting equipment, truck spare parts, and smart fleet, fuel and diesel management solutions — built on more than a decade of hands-on experience in plant, machinery and vehicle (PMV) management.

Our Mission

To provide quality products and professional services to our customers, drawing on years of experience in PMV management. We strive to be your trusted and reliable construction equipment supplier and service provider.

Our Vision

To achieve the highest level of recognition as a professional equipment solution provider across the United Arab Emirates.

Our Values

- Trust and integrity — an unwavering commitment to always do what is right.
- Respect for the diverse ideas and cultures of our people.
- Recognition of the vital role our employees play in supporting the economy and our country's needs.
- Excellent service and customer care — keeping schedules and quality standards on every project.
- Continuous improvement through ongoing training and shared best practice.
- Environmental stewardship — striving to deliver projects with due care for the preservation, protection, conservation and restoration of our resources.

WHY AL BALQA

Over a decade in business has taught us what contractors actually need from an equipment partner: the right machine, on site, on time — backed by a team that stands behind it after delivery. That's what we've built.

- Established & family-owned — operating in Dubai since 2013, with a stable client base and long-term relationships built on reliability, not one-off deals.
- Recognized brand-name fleet — Liebherr, Terex Comedil, Potain, QLCM, Yongmao, SYM, SCM, Zoomlion and other leading manufacturers, not unbranded substitutes.
- Full lifecycle coverage — sales, rental, erection, dismantling, maintenance, training and spare parts under one roof, so you have a single point of accountability.
- Regional reach — equipment and spare parts supply extends across the GCC and wider MENA region, with completed projects in Oman, Iraq, Somalia and Tanzania.
- Commercial flexibility — financing options, buy-back, lease-to-buy, crane exchange, and short- or long-term lease contracts structured around your project, not a fixed template.
- Dedicated technical teams — specialized crews for critical dismantling and lifting from high-rise towers, backed by responsive breakdown attendance.

EQUIPMENT & SERVICES

ABGT provides sales, rental and servicing of heavy construction lifting equipment across the UAE, and can supply equipment and spare parts throughout the GCC and MENA region.

1. Tower Cranes

We stock all types of brand-new and used tower cranes — top-kit, topless, luffing jib and derrick cranes — in a range of capacities, sourced from leading manufacturers including:

Liebherr · Terex Comedil · Potain · QLCM · Yongmao · SYM · SCM · Zoomlion

Multiple tower cranes on site

2. Construction Hoists

Single- and double-cabin passenger and material hoists, supplied to your project specification for building construction or specialized industrial structures. Our frequency-conversion hoists run smoothly at up to 96m/min, with lower start-up current, power savings, and reduced wear on braking — engineered for reliability under continuous site use. Leading brands include:

GJJ · Truemax · Alimak · Zenith

Hoist installation on a high-rise tower

3. Suspended Platforms / Cradles

Our suspended platforms and cradles provide safe, temporary access to height for building maintenance and construction on both commercial towers and industrial sites. ZLP-series cradles form the core of our fleet and are widely used across building maintenance and construction projects.

Cradle deployed on an industrial structure

4. Concrete Placing Booms

Our HG-Series concrete placing booms combine a reasonable, reliable design with a 360° rotary arm that operates smoothly by hand. Tower height is set so the placing position can be adjusted freely — simply and efficiently — making these booms a highly economical solution for concrete placement on site.

Placing booms ready for deployment

SPARE PARTS

We hold a wide range of original and OEM spare parts in stock, at competitive prices, so equipment downtime is measured in hours, not weeks.

Heavy Construction Equipment Spare Parts

Parts and accessories for tower cranes, construction hoists, cradles, placing booms, mobile cranes and other lifting equipment — including anti-collision systems, mast sections, inverters and safety devices, contactors, rectifiers, relays, power and control cables, motors, gears, pumps, hydraulic jacks and wire ropes.

Truck Spare Parts

Original and OEM spare parts for HINO, MAN, SCANIA and RENAULT trucks, readily available in stock at affordable prices — including AC compressors, condensers, evaporators, clutch release bearings, cable assembly transmissions, oil filters, V-belts, alternators, starters, thermostats, heavy-duty cables and other genuine parts.

SERVICES

1. Technical Support

A team of talented, hardworking and well-qualified tower crane engineers, strictly following local and international safety standards across every project. We are specialized in critical dismantling and lifting from high-rise towers, with dedicated teams for:

- Erection of tower cranes, hoists, cradles and placing booms
- Dismantling of tower cranes, hoists, cradles and placing booms
- Breakdown attendance
- Equipment repair and servicing

2. Maintenance

We protect your return on investment with ongoing care for your cranes and hoists — including refurbishing, painting, stocking and fixing — plus monthly preventive maintenance and Annual Maintenance Contracts (AMC), tailored to your equipment's requirements.

3. Training

Upon request, we train your team to operate our tower cranes fully independently — covering mounting and dismantling of equipment, safety rules, and comprehensive instruction on tower cranes and hoists.

4. Sales Support

We offer flexible trading options to maximize customer satisfaction, including financing methods, buy-back, lease-to-buy, crane exchange, and short- or long-term lease contracts.

SAFETY & QUALITY COMMITMENT

Lifting equipment carries real safety and liability weight, and we treat it that way. Our technical teams follow local and international safety standards across every project stage — erection, operation, dismantling and maintenance

— and our maintenance programs (including scheduled preventive maintenance and Annual Maintenance Contracts) are built to keep equipment inspection-ready throughout its time on your site.

We're glad to provide project-specific safety documentation, equipment certification and maintenance records on request as part of any quotation or contract discussion.

TRACK RECORD

We're proud to work alongside the following companies and be part of their projects' success — a partial list of clients across the UAE and internationally:

Within the UAE	Outside the UAE
Eastern International LLC	Adhi Oman
